

ROUTER PLANE HANDHELD

Router Plane Handheld

- Our router plane for woodworking is easy to adjust depth and operation, easier than other handheld router plane blade which goes straight up/down and is bent at 90 degrees.
- Supplied with 3 HSS Blades (3,6 & 8mm) easy to cut wood, once you set the depth, make sure the upgraded Tilting version Handles is easier to Handle the Router Plane & tighten blade and does not hurt hands at all, especially for hard wood.
- You can work done perfectly, it is ideal for the smaller sort of woodwork projects, and it's also a great DIY enthusiasts tool. Besides, you will work in peace and quiet environment without the din made by an electric router.
- **STAINLES STEEL BODY** making the Router Plane Sturdy, Durable & Rust Proof.
