

MAGNETIC PICKUP TOOL CLEANER

- Telescoping Shaft: Many magnetic pick-up tools have a telescoping or extendable shaft that can reach into deep or narrow spaces, making it easier to retrieve items.
- Handle or Grip: A comfortable handle or grip at the other end of the tool provides a firm hold and control.
- These tools are commonly used in various settings, including automotive repair, construction, woodworking, and DIY projects.
- They are especially handy for reaching items that have fallen into tight spaces, like engine compartments, behind appliances, or within machinery and gathering Small metal waste
