

## MINI SQUIRREL PALM PLANE

- Palm planes are ideal for working on small projects and in areas where a larger plane would be cumbersome.
- These compact planes have an enlarged squirrel-tail handle for better in-hand registration and comfort, and the elegant blade-fixing mechanism.
- The flat palm plane is perfect for chamfering and trimming, while the curved palm plane has the sole rounded side-to-side (1 1/2" radius) and front-to-back (12" radius), making it ideal for working hollows such as on chair seats.
- The investment-cast steel bodies are accurately machined and have a 45° bed angle and a fixed mouth.
- The flat plane has a lapped sole the curved plane has a finely milled sole.
- The blades are 30° bevel lapped tool steel (0.085" thick by 1" wide), and are secured with a cogwheel screw.

T O O L S

Cat No.	OAL (Including Tail)	Sole Length	Blade Width
GSP-0193	4.5" (115MM)	3.1/8" (80MM)	1" (25MM)
