

QUICK CHANGE TOOL POST SET DIXON TYPE

- Manufactured from hardened Alloy Steel and precision ground surface.
- Set supplied with suitable parting blade and spanner.
- The quick change feature typically involves a simple and reliable mechanism for securing and releasing tool holders swiftly
- The Dixon Type toolpost may feature adjustable tool holders, allowing machinists to set the cutting tools at precise angles or heights to meet specific machining requirements.
- The primary advantage of a quick change toolpost is its ability to facilitate rapid and hassle-free tool changes on a lathe. This design allows machinists to swap out cutting tools quickly, reducing downtime and improving efficiency.
